CASH

Time Period: 10/1/2017 to 9/30/2018

HOW TO USE WBID

WBID is designed to participate in market advances and protect capital during market declines. With WBI's time-tested active risk management, WBID is a great tool to pair with passive ETFs to reduce down-market correlation, volatility, and loss of capital.

Past performance is not indicative of future returns. You cannot invest directly in an index. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Returns less than one year are not annualized. For the most recent month end performance visit www.wbietfs.com.

Russell 2000 Value	7.14%	9.33%	9.40%

IMPORTANT INFORMATION

Past performance is not indicative of future results. An investment in the Fund is subject to investment risk, including the possible loss of principal amount invested. The Fund may invest in foreign and emerging market securities, which carry additional risks, such as currency fluctuation, economic or financial instability, lack of timely or reliable financial information, or unfavorable political or legal developments. An investment in the Fund varies with the success and failure of the Sub-Advisor's investment strategies and the Sub-Advisor's research, analysis, and determination of portfolio securities. The investment process includes the use of proprietary models and analysis that rely on third-party data and, if inaccurate, could adversely affect the Fund performance. The Fund may invest in Exchange-Traded Funds (ETFs), mutual funds, and Exchange-Traded Notes (ETNs), which will subject the Fund to additional expenses of each ETF, mutual fund, or ETN and risk of owning the underlying securities held by each. Options on securities may be subject to greater fluctuations in value than an investment in the underlying securities. The Fund may invest in Real Estate Investment Trusts (REITs). Risks commonly associated with the direct ownership of real estate include fluctuations in the value of underlying properties, defaults by borrowers or tenants, changes in interest rates, and risks related to general or local economic conditions. In addition, the Fund is subject to market risk, dividend risk, growth risk, value risk, debt security risk, high-yield security risk, master limited partnership risk, small- and medium-sized companies risk, portfolio turnover risk, securities business risk, and trading price risk.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in creation units only. Market returns are based upon the midpoint of the bid-ask spread at 4:00pm EST (when NAV is normally determined for most ETFs). Market price returns do not represent the returns you would receive if you traded shares at other times. SEC Yield reflects the dividends and interest earned during the most recent 30-day period covered by the Fund's filings with the SEC, after the deduction of the Fund's expenses.

Russell 2500 Value TR Index: comprised of Russell 2500 companies with lower price-to-book ratios and lower forecasted growth values. **Russell 2000 Value TR Index:** comprised of Russell 2000 companies with lower predicted and historical growth rates.

Benchmark shown effective as of 10/31/18, prior benchmark comparisons could have been better or worse over the same period and are not indicative of future performance.
