ONE YEAR PERFORMANCE

WBIR vs. Custom Benchmark

Time Period: 10/1/2017 to 9/30/2018

CASH

Time Period: 10/1/2017 to 9/30/2018

HOW TO USE WBIR

WBIR is designed to participate in market advances and protect capital during market declines. With WBI's time-tested active risk management, WBIR is a great tool to pair with passive ETFs to reduce down-market correlation, volatility, and loss of capital.

Past performance is not indicative of future returns. You cannot invest directly in an index. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Returns less than one year are not annualized. For the most recent month end performance visit www.wbiifts.com.

IMPORTANT INFORMATION

Past performance is not indicative of future results. An investment in the Fund is subject to investment risk, including the possible loss of principal amount invested. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Generally, all debt (fixed income) securities are subject to two types of risk: credit risk and interest rate risk. Interest rates may go up resulting in a decrease in the value of the debt securities held directly by the Fund or indirectly through a broad array of registered investment companies, exchange-traded funds, exchange-traded vehicles issuing equity securities, and exchange-traded notes (referred to collectively as "exchange-traded products" or "ETPs"). Credit risk is the risk that an issuer will not make timely payments of principal and interest. The Fund's investment performance, because it may be similar to a fund of funds, depends on the investment performance of the ETPs in which it invests. An investment in the Fund is subject to the risks associated with ETPs that comprise the Fund's portfolio assets which include: foreign and emerging market securities risk, concentration risk, convertible securities risk, derivatives risk, commodities risk, currency risk, geographic risk, small- and medium-sized companies risk, equity options risk, high-yield securities risk, credit/default risk, counterparty risk, floating rate loans risk, leverage risk, zero coupon securities risk, and mortgage-backed securities risk.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Owners of the shares may acquire those shares from the Fund and tender those shares for redemption to the Fund in creation units only. Market returns are based upon the midpoint of the bid-ask spread at 4:00pm EST (when NAV is normally determined for most ETFs). Market price returns do not represent the returns you would receive if you traded shares at other times. SEC Yield reflects the dividends and interest earned during the most recent 30-day period covered by the Fund's filings with the SEC, after the deduction of the Fund's expenses. The unsubsidized yield reflects the 30-day yield if the investment adviser were not waiving all or part of its fee or reimbursing the fund for part of its expenses.

Russell Global TR Index: measures the performance of the global equity market based on all investable equity securities. **Bloomberg Barclays Glob al Aggregate TR Index:** multi-currency benchmark that includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. **MSCI ACWI Index:** captures large and mid cap representation across 23 Developed Markets and 24 Emerging Markets countries with 2,499 constituents, covering approximately 85% of the global investable equity opportunity set.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indexes or any securities or financial products. This report is not approved, endorsed, reviewed, or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such.

Benchmark shown effective as of 10/31/18, prior benchmark comparisons could have been better or worse over the same period and are not indicative of future performance.
